More Tips from The Garden Porch

for East Texas Gardeners

Don't Plant Too Early (or Too Late)

Trust us! East Texas weather can be tricky. Plant too early, a freeze will kill your plants. Plant too late, and the heat will stop them from thriving.

Water Deep, Not Daily.

Roots go where the water goes and you want strong roots that are deep. Train them to dig deep and your plants will be so much happier (and so will you).

Mulch heavy.

Keeps your soil cool in the summer and warm in the winter with mulch. Your plants will like it and your weeds won't like it. Plus, it looks pretty and who doesn't like pretty things in the garden
